

# Magento

## Frontend

1. In the customer account add a new link to menu.
2. When opening the link, show a form with one text field "Status" and the button "Save"
3. When a customer fills in the status and presses the save button, the status gets saved.
4. The status must be displayed in the top right corner. Right after the welcome message.
5. It must work correctly with all the caches enabled

## Backend

1. The saved status must be displayed in admin on the customer edit page.
2. Admin can change the status

Please only send in custom module (Magento2 extension) that overrides core functionality. For this task you should be able to set up Magento2 locally by yourself.
